

<b>Job Title</b>	<b>QA Engineer (Permanent Position)</b>
<b>Location</b>	<b>UK - Guildford (Surrey Research Park)</b>
<b>Reporting To</b>	QA Team Leader
<b>The Company</b>	Infonic is a fast-growing, leading edge software provider, specialising in Document/Knowledge Management, listed on the AIM market, and operating in Europe, the US and Asia.

### **Summary of Requirements**

- Working as a member of the Quality Assurance Team, writing and executing test scripts in accordance with company guidelines and standards.
- Ensuring that high quality and accuracy is maintained through to software release.
- To prepare test specifications and test scripts to test each software component, demonstrating the business condition under test and the expected results.
- To provide feedback to the development team and ensure that work is carried out in accordance with the schedule and the quality requirements.
- To provide estimates and feedback to the QA Team Leader for scheduling purposes.
- Must be enthusiastic and motivated, and a good team player. Excellent interpersonal and communications skills are required.

### **Key Skills/Attributes:**

- Minimum 2 years working as a software tester.
- Knowledge of structured test methods and processes.
- Good knowledge of manual testing. Experience of automated testing an advantage.
- Experience of using a defect management tool.
- Experience of testing Windows Software Applications on both desktop and web applications. Some knowledge of programming languages (C#, C++) an advantage.
- Ability to write test specifications and manual test scripts.
- Ability and willingness to execute test scripts. Must want to pursue testing as a profession.
- Strong familiarity with recent Microsoft based operating systems (2000, XP and onwards).
- Good knowledge of use and configuration of internet browsers such as Internet Explorer 6 and 7.
- Knowledge of use and configuration of IIS.
- Good knowledge of Windows permissions.
- Knowledge of Microsoft SharePoint an advantage.
- Understanding of how testing fits into the full development life cycle.
- Excellent communication skills – able to discuss defects with developers effectively and diplomatically.
- A thorough approach to work and a commitment to Quality.

**Basic Salary Package**

Circa £25K, dependent on skills and experience

**Benefits**
